APPLICATION FOR AMENDMENT OF POLLUTION CONTROL PERMIT PE-136

THIS APPLICATION is to be filed with the Director of Pollution Control, 1106 Cook Street, Victoria, B.C. V8V 1X4.

Any person who qualifies as an objector under section 16 of the *Pollution Control Act* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or where service is required, within 30 days of serving a copy of the application, file with the Director at the above address an objection in writing to the granting of an amendment stating the manner in which he is affected.

Preamble—The purpose of this application is to obtain an amended permit which allows the discharge of increased flows from an expanded treatment plant.

Norman Howard, P.Eng., Chief Engineer of the Capital Regional District, hereby applies for amendments, as described below, to Pollution Control Permit PE-136, granted on September 3, 1965, amended on October 8, 1971, and October 7, 1977, which authorized the discharge of effluent from municipal sewerage system located at Sidney, B.C., to Sidney Channel.

Amendments Requested:

The existing facilities consist of a high rate activated sludge treatment plant capable of treating a maximum daily flow of 1,300,000 imperial gallons and a sea outfall. The pumping facilities and screens sized for a peak flow of 6,700,000 imperial gallons a day.

It is proposed to change the process for the entire plant to a conventional activated sludge system and to increase the maximum treatment capability of the plant to 2,000,000 imperial gallons a day and the peak flow pumping and screening capacity to 8,000,000 imperial gallons a day.

A study is currently under way to determine the best way to dispose of the sludge from the plant.

This application, dated on July 9, 1980, was posted on the ground in accordance with the Pollution Control Regulations.
